Combining plots

Install, then load patchwork:

```
library(patchwork)
```

Setup some example plots

```
p1 <- ggplot(mtcars) + geom_point(aes(mpg, disp))
```

```
p2 <- ggplot(mtcars) + geom_boxplot(aes(gear, disp, group = gear))
```

```
p3 <- ggplot(mtcars) + geom_smooth(aes(disp, qsec))
```

```
p4 <- ggplot(mtcars) + geom_bar(aes(carb))
```

Use patchwork to combine them here:

```
(p1 | p2 | p3) /
```

```
p4
```

```
## 'geom_smooth()' using method = 'loess' and formula 'y ~ x'
```
